A GREAT WORK; AN HONOR TO AMERICA, HARPER AND BROTHERS, 327 to 336 Pearl street (Frankin square), publish May 10. LXBUT MAURY'S GEOGRAPHY OF THE SEA.
The Physical Geography of the Sea. Ph. F. Maury, LL.D.
U. S. Navy. With woodouts and charts. New edition, greatly enlarged and improved from entirely new places, 6vo., musiki \$1.00.

enlarged and improved from entirely new places, 870., muslin \$1.50.

The favor with which this work has been received by the public, exhibits a degree of success that is rarely accorded to purely scientific productions. Within a year from its first issue it cas peaced through five large editions, has eliniced universa commendation from the press, has assumed the rank of a stand and authority on the subject of which it treats, and has placed the author among the front ranks of the man of science in this country. The sixth edition, which is now offered to the public is certabed with numerous important additions. giving the result of the latest discoveries in maritimes geography, and correcting the theories previously set forth by the light of new of servations. The publishers are confident that the present edition will challenge ro less attention in the scientific and commercial world than those which have preceded it, and the physical enquirer will find a similar cordial and extensive a precedition.

physical enquirer will find a similar cordial and extensive appreciation.

To the study of the sea in its tu a correspondences the work before us will be of invaluable service. It embruces in its range a rallocophical account of the winds and ourrents of the sea; of the circulation of the atmosphere and ourrents of the sea; of the circulation of the atmosphere and ourrents of the sea; of the temperature and depth of the sea; of the wonders that are hidden in its depths; and of the various phenorems that display them selves upon its surface. In short it treats of the comount of the sea and its adaptations—of its salls, its waters its climates, its inhabitants, and of whatever there may be of general instead in its commercial uses of re custrial pursuits, as all such infine me find of recearch the author has presented in such a manner as to instruct and interest and the sea of the great of t

the great deep."

LOOMIS'S ARITHMETIC.

A Treatise on Arithmetic, Theoretical and Practical. By its Loomis, LL D., Protessor of Mathematics in the New ork University. A freezine on Arithmesic, Theoretical and Practical, By Riss Loomin, L.L. D., Protessor of Mathematics in the New York University L.D., Protessor of Mathematics in the New York University.

This volume is designed to impart such a knowledge of the principles of arithmetic as is required for the man of business, or as a pre-saration for the study of the higher mathematics.

The tolening are fixed in the study of the higher mathematics.

1. The definition are concise yet explicit and comprehensive. The rules free contacts with brevity, yet is so clear a meaner as to be easily understood.

2. Rules are not given without explanation or demonstration; and these explanations are so very simple, that pupils of an early age can easily comprehend them.

3. Great care has been taken to arrange all the subjects in their ratural order, and not to employ a principle until it has been demonstrated. When a rule is made to depend upon some preceding principle, the connection is indicated by a reference to the number of the artic's.

4. Every principle is illustrated by a copious collection of examples, and all the methods of computation required in the ordinary business of a counting house are fully explained.

5. The most important information required respecting the usual forms of business is given in a clear and concise manner, jet care has been taken to exclude all irrelevant muter, which would only increase the size of the book without adding to its vaire.

6. At the bottem of each page is arranged a series of ques-

ner, rei care has been taken to exclude all irreievant matter, which would enly increase the size of the book without adding to its vaire.

6. At the bottem of each page is arranged a series of questions, which together comprehend every importunt principle in the book. These questions, if properly attended to, will prove high useful to the pupils in review.

7. The answers to about one third of the questions are given in the body of the work; but, in order to lead the student to rely upon his own judgment, the answers to the remaining quest can are outposely omitted. For the convenience, however, of such teaccers as may desire it, there is published a rheal edition containing the answers to all the questions.

The course of multensales by Prof. Loomis has now been for several years before the public, and has received the general approparion of teachers throughout the country. The following are some of the instituous in which this course has been introduced; either whole of the instituous in which this course has been introduced; either whole of the particular of the particula

[From the Methodist Quarterly Beview, edited by the Rev. J. McClintock, D.D.]

Professor Loomis' text books in mathematics are models of neaters, precision, and practical adaptation to the wants of stadents. stadents. [From Soott's Weekly Paper, Canada]
These books are terred in style, clear in method, easy of compreheasion and pertectly free from that unclease verblage with which it is too much the fashion to load school books, under pretence of explanation.

These books are terse in style, clear in method, easy of comprehension and periodity free from that nucleus verblage with which it is too much the Tashion to load eshool books, under pretence of explanation.

Prof. Loumis two forgs, a valuable service to mathematical solution of the course of text books held preparing. His writings in other departments of sciences are cheracterized by a remarkable of carness in the manner in which he exhibits truth, and his mathematical text books here evident marks of their having emanated from the same mind.

Rapper & Brothers publish the following works by Professor Leomis:

Arithmetic, Riements of Algebra, Treatse on Algebra, Practical Astronomy,

Elements of Germetry, Recent Progress of Astronomy.

On, SKETCHER AND BURLESQUES

I vol. 12 mo. cio. With portent of the author. 5i.

This volume unquestionably excels any book of humor that has ever been published in America; and as a pract of the fact, we amer the optimins of sone of the leading and initiantial journals of the country, nearly all of when have pronounced John Fhoetic 'she great wit of the ago."

(From the Utes Haraid)

There sketches are characterized by much humor, and will be found highly entertaining. The illustrations—especially the frontispiece—are worthy of Cruikchank.

(From the Boston Evening Traveller.)

The volume will make the most serious reader shake hig sides at us mirthful delineations of character and stratches of events.

(From the Boston Telegraph)

family.

(From the New Orleans Delta.)

Who is John Phoeniz? We surmise that he is a reproduction, in human forms. John the sales of Foote, or Mathews, or Lamb., or some other great master of English burisaque.

We advise all who like iresh and genuins humr to prepare their money to purchase an early copy. "Dossticts" was but a first initiation of John Phoeniz, who has originated a school of the hyperbolical and furdesque.

THE FIREMEN.

NEW YORK HOSE COMPANY, NO. 5.—AT THE REGUlar sanual meeting of this comeany, held at the currisgtense on Menday evening, Mar 5, 1885, tas following preamble
and resolutions were unanimously adopted:—
Whereas, the loreman of this company, Mr. James F. Wenman, has been called by the suffrages of his brother fremen
throughout the Department to fill the high and responsible post
of assistant Regimeer; and whereas, the necessity of accepting
his resignation is thereby forced upon my; be it therefore
Resolved. That in accepting the resignation of our foreman
Mr. Jas. F. Wenman, we take occasion to express to him our
unanimous appreciation and approval of the promot, efficien
and fearless manner in which he has dieberged the duties of
chief officer of this company for the past six years.
Resolved, That as an officer, a member, a companion and a
friend, we have ever found Mr. Wenman alike fathful; bit
many good qualities of bead and heart have cudeared him to
use by the closest ties, and rendered our association with him
one of the most pleasing memo les of our lives.
Resolved, That we coagrantiate the Fire Department a
large on having received the serviers of a gantioman ow well
qualified in every respect to discharge the duties of that enalted
station—one who will both dignity and adorn the office, as well
when on duty as in the more retired waits of private life.
Resolved, That we shall as all times, be proud to find unor
our books the passe of James F. Wenman as an honorary
member, and will ever be grantified to he e- him with us at our
company meetings, that we may reserve the benefit of that advice which long experience renders him so oursphere its give.
Received, That a copy of the foregoing presumble and resolutions be entered upon our minutes, a copy thereof, suitable company meetings, that we may not so competent to give, vice which long experience renders him so competent to give. Received, That a copy of the foregoing preamble and resolutions be entered upon our minutes, a copy thereof, suitable engramed pre-ented to Mr. Wenman and the same published in the Bezald, Sunday Mcroury, and Leader.
